ABOUT US:

For more than 30 years, J. Dubs has been crafting quality metalwork products while offering the best warranty and finest customer service. If you are not 100% satisfied with your purchase, we will refund or replace the product with no hassle. This policy has worked for more than 30 years.

Happy customers come back!

We have been creating functional, decorative, and architectural silhouetted images for private and commercial customers since 1980. We specialize in decorative balcony panels for deck or loft railings, with over 600 panels to choose from. But we also feature a wide variety of decorative silhouettes as well as ranch, commercial, and home signs, hand railing, and a new line of municipal street fixtures.

If you don't see what you want, but have an idea or sketch, just drop us a line for a free custom quote. We love working with creative minds to build something that hasn't existed before.

We are able to keep our prices lower than our competitors because we design, cut, fabricate, powder coat, box, and ship all products on site at our workshop here in south central Montana.

About Our Family

CUSTOM BALCONY PANELS

Above: Custom Flat Panel being installed into a happy customer's home!

With more than three decades of satisfied customers, J. Dub's Metalworks has the best prices, the highest quality, the most images, and the fastest turnaround time for balcony panels across the nation! Each of the balcony panel types below are available in our standard dimensions of 24 to 48" tall. We also offer Custom Panels to fit any situation you might have.

Our balcony panels are cut from 3/16" steel plate, which is around the thickness of three stacked quarters and weighs around 17 pounds per linear foot. The panels are hand drawn and machine cut, then cleaned and powder coated. Unless otherwise stated, all balcony panels meet a 4" maximum gap building code.

Linear Feet vs. Square Feet:

The **linear feet** is the length of the panel, regardless of height.

The **square feet** is the length of the panel multiplied by the height to find the total area.

Our goal is to give you the best price , the most options, and the best customer service.

Standard “Flat” Balcony Panels

“You make it fit” — Fastest turn around and best price

Choose one of the balcony panels we have already drawn, and you make it fit your space. Over 600 panels to choose from! If you don't see a panel you like, let us know, and we'll design one for you.

****NOTE:** *If you find a panel that you like, but it's too long, we can reduce the panel length (only) without charging a custom price. Just tell us what part of the image you would like.*

Pricing for our Standard “Flat” Balcony Panels:

Less than 20 " tall = \$45 – \$126 per linear foot

20" to less than 30" tall = \$153 per linear foot

30" to less than 36" tall = \$179 per linear foot

36" to 48" tall = \$210 per linear foot

******We do not recommend balcony panels longer than 12', but they are available. We suggest breaking a long run into sections for structural purposes. Any height panel longer than 12 feet will be charged \$60 per foot over 12 feet in addition to the above prices.***

Flat Panel Installation Diagrams and Pricing:

For Logs: Cut a groove 1" deep and .25" wide in the top and bottom logs. The ends can also be grooved. Insert the panel when assembling the log railings.

For Milled Lumber: You can groove the wood, or simply order the panel to fit the opening and trim with quarter round on both sides.

Flat Style

24"x72" Elk 2 Flat panel= \$750

2' tall = 24" tall

24" is more than 20", and less than 30", so this panel would cost \$ 125 per linear foot

This panel is 6 feet long, so it would be $6 \text{ lft} \times \$125/\text{lft} = \750

To find linear feet of panel:

$$[\text{length in inches}] \div 12 = \text{lft (linear feet)}$$

To find price of panel:

$$\text{lft} \times [\text{price per lft}] = \text{panel price (round up to nearest multiple of 5)}$$

The price for Custom Balcony Panels is the same as Standard Panels, plus \$125 per hour of draw time (1 hr minimum). Rearranging images we already have into a custom size is usually quick. Drawing and assembling new images takes a lot more time.

Standard “Trimmed” Balcony Panels

“You make it fit” — we make it easy to mount

Choose one of the balcony panels we have already drawn, you make sure it fits your space, and we will add a 1.5” x .25” metal strap all the way around it, with holes for mounting. Over 600 balcony panels to choose from!

Pricing for Standard “Trimmed” Balcony Panels

Less than 20” tall- \$158 per linear foot

20” to less than 30” tall - \$179 per linear foot

30” to less than 36” tall - \$215 per linear foot

36” to less than 48” tall - \$237 per linear foot

******We do not recommend balcony panels longer than 12’, but they are available. We suggest breaking a long run into sections for structural purposes. Any height panel longer than 12 feet will be charged \$60 per foot over 12 feet in addition to the above prices.***

Trimmed Panel Installation Diagram:

Panel fits in the opening, insert screws through the holes in the metal strap.

1.5" x .25" strap all the way around the panel with two sets of holes on each side, or where requested.

The 1.5" x .25" metal strap is highlighted in blue. In the finished product it will be the same color as the panel.

Pricing:

Trimmed Style

24"x72" Elk 2 Trimmed panel= \$900

2' tall = 24" tall

24" is more than 20", and less than 30", so this panel would cost \$ 150 per linear foot

This panel is 6 feet long, so it would be $6 \text{ lnft} \times \$150 / \text{lnft} = \900

To find linear feet of panel:

$$[\text{length in inches}] \div 12 = \text{lnft (linear feet)}$$

To find price of panel:

$$\text{Lnft} \times [\text{price per lnft}] = \text{panel price (round up to nearest multiple of 5)}$$

The price for Custom Balcony Panels is the same as Standard Panels, plus \$100 per hour of draw time (1 hr minimum). Rearranging images we already have into a custom size is usually quick. Drawing and assembling new images takes a lot more time.

Standard “Finished” Balcony Panels

“The Easiest to Install”

Choose one of our 30-inch tall balcony panels we have already drawn, tell us you want a finished panel, and we'll send you a balcony panel ready to screw into place. No trim or grooving of logs required. The panels come complete with top and bottom metal railings which are rectangular tubes 1.5" wide x 1" tall, with 1.5" x .25" metal side trim with holes for mounting and 4" footings. The total finished height is 36 inches.

Price for Standard “Finished” Panel

36" tall = \$221 per foot

*****We do not recommend balcony panels longer than 12', but they are available. We suggest breaking a long run into sections for structural purposes. Any height panel longer than 12 feet will be charged \$60 per foot over 12 feet in addition to the above prices.**

Finished Panel Installation Diagram:

Panel fits between the posts, insert screws through the mounting holes in the metal strap and through the feet on the floor.

1.5" x 1" rectangular tubing on the top and bottom,
 1.5" x .25" strap with mounting holes on the sides,
 3" x 1.5" feet with holes to bolt to the floor.

The 1.5" x 1" rectangular tube, the 1.5" x .25" metal strap and the feet are highlighted in blue. In the finished product they will be the same color as the panel.

Pricing:

Finished Style

36" x 72" Trees Finished Panel= \$1080

This is a 36" tall finished style panel, so it would cost \$180 per linear foot

This panel is 6 feet long, so it would be $6 \text{ lnft} \times \$180 / \text{lnft} = \1080

To find linear feet of panel:

$$[\text{length in inches}] \div 12 = \text{lnft (linear feet)}$$

To find price of panel:

$$\text{Lnft} \times [\text{price per lnft}] = \text{panel price (round up to nearest multiple of 5)}$$

The price for Custom Balcony Panels is the same as Standard Panels, plus \$100 per hour of draw time (1 hr minimum). Rearranging images we already have into a custom size is usually quick. Drawing and assembling new images takes a lot more time.

Stair Panels

"Fits Up and Down" – Any of the above types of panels specifically cut at angles to work with your stairs.

All stair panels are custom drawn to fit your opening. In order for us to build your panels, we will need the measurements shown in the installation diagram below as well as what images you would like on your panels. The stair panels shown below are possible examples. We have crafted thousands of stair panels over the years, and we'll need more information from you before we get started.. If you have any questions before ordering, just email us or call us at (800) 622-9015.

Prices:

FLAT STYLE:

*Less than 20" tall- \$163 per linear foot
20" to less than 30" tall - \$184 per linear foot
30" to less than 36" tall - \$221 per linear foot*

TRIMMED STYLE:

*Less than 20" tall- \$189 per linear foot
20" to less than 30" tall- \$216 per linear foot
30" to less than 36" tall- \$252 per linear foot*

FINISHED STYLE:

36" tall- \$263 per linear foot

50% prepayment needed please

***The remainder of the stair panel price, plus shipping, is charged to your credit card when the panel is shipped. We will email, mail, or fax you an order confirmation*

Stair Panel Installation:

Upon deciding that you would like to go with custom stair panels, we will need these measurements in order to ensure proper fit into your stair railings.

We need from you the following measurements:

- 1 =
- 2 =
- 3 =
- 4 =
- 5 =
- 6 =

Angle z =

1 and 2 should be the same length. 3 and 4 should be the same length.

If these lines are not the same length we will need a template. The price of Panels made from templates are by bid. A small extra charge will be calculated after we receive the template and it is determined by the complexity of the template.

We also need from you a rough sketch showing us the layout of your panels.

For example:

Please tell us if your stair panel(s) has a "front."

CUSTOM RAILING

J.Dub's Metalworks started moving towards metal railings that are custom made to order using a variety of different sized materials based on customer preference. These railings are built to code and have served our local customers well for almost a decade, and we are ready to start providing them to the rest of the world as well!

Since these railings vary so much based on make and material, we do not carry standard railings. This also means that our prices are not a standard price for every railing. Every railing is custom made, and we are always happy to work with you on your custom job.

Custom Hand Railing

**-All Handrail Jobs are based on bid-
Pricing starts at \$126 per linear foot regardless of material. Contact us
with all of your hand rail inquiries!**

Custom Grab Railing

Our most common grab railing is made with 2"x1" Rectangle Tubing as seen above, but can be made with any material of your choosing.

Pricing for grab rail is based on bid, but it **starts at \$37 per linear foot** regardless of material. Contact us for all of your grab rail inquiries!

OUR CUSTOM SIGNS

Our design team will communicate with you through the entire process from start to finish through email, phone, or if you're in the area, don't hesitate to come into our showroom so we can sit and discuss the process together!

Our custom signs are made with thought, time, precision, and many hands who oversee everything from concept, to drawing, all the way through to the finished process. Each sign goes through a rigorous multi-step process to ensure that all custom work is designed, cut, and finished to the highest quality standard for our customers.

Our signs are typically made of 10 Gauge steel. While other sizes are available, over the years we have learned that 10 Gauge seems to hold it's integrity the best. Powder coating is also a large part of our process. All signs are powder coated in a high quality, semi-textured black powder coating that will withstand the elements, and keep your sign looking as new as the day you received it for many, many years.

Prices:

- Custom Ranch Sign and Silhouette Pricing is based on square footage starting at \$89/sqft

Custom Ranch Signs

Prices:

10 gauge: \$89 per square foot

3/16" plate: \$100 per square foot

Custom Flush/Wall Mount Ranch Sign

3' x 2' Custom Flush Mount Ranch Sign= \$420

This is a 10ga Steel custom ranch sign, so it would cost \$70 per square foot

This sign is 3 feet long and 2 feet wide, so it would be $3 \times 2 = 6 \text{ sqft} \times \$70/\text{sqft} = \$420$

To find square feet of sign:

$$(\text{length in inches}) \times (\text{width in inches}) \div 144 = \text{sqft (square feet)}$$

To find price of sign:

$$\text{Sqft} \times (\text{price per sqft}^{**}) = \text{sign price (round up to nearest multiple of 5)}^{***}$$

**price per sqft varies depending on size and material thickness of sign

***this price includes 1 hr of draw time and powder coating cost

Custom Hanging Ranch Sign

3' x 2' Custom Hanging Ranch Sign= \$450

Sign price is \$420, with hangers it's \$450

This sign is 3 feet long, so the hangers would cost $3 \text{ lnft} \times \$10/\text{lnft} = \30

To find linear feet of sign:

$$[\text{length in inches}] \div 12 = \text{lnft (linear feet)}$$

To find price of sign with hangers:

$$[\text{sign price}] + (\text{Lnft} \times \$10/\text{lnft}) = \text{sign w/ hangers price (round up to nearest 5)}$$

50% prepayment needed please

****The remainder of the sign price, plus shipping, is charged to your credit card when shipped. We will email, mail, or fax you an order confirmation.**

SILHOUETTES

Silhouettes can be used for signs, fences, gates, or decorative applications for inside or out.

Some of the images found below can include trees and mountains if desired.

Many other images have been custom made, so if you have something you want, but don't see it, just let us know. All of our decorative silhouette images can be reduced or enlarged to fit your needs.

Mounting

When ordering, please keep in mind the following:

We have two standard mounting methods: Flush Mount and Post Mount.

- If intended for a Flush Mount Decorative Application, please tell us where you would like us to put the mounting holes.
- For Post Mount, we weld a .25"x1.5" metal strap perpendicular to the bottom with mounting holes.
- **For Post Mount 4 ft and longer, there is an additional price increase of \$5 per foot (after 4')**

Post Mount (1.5"x.25" Flat Strap with mounting holes on bottom)

Flush or Wall Mount (holes cut in the sign to accommodate for mounting)

Decorative Silhouettes

**The images on the Weather Vanes page and the images on the Coat Racks page can also be used for Decorative Applications.

DECORATIVE SILHOUETTE EXAMPLES:

Prices:

- For Standard Silhouette pricing please see the catalog at the back of this packet
- Both Custom Silhouette Pricing and Custom Ranch Sign Pricing are based on square footage starting at \$89/sqft

50% prepayment needed please

***The remainder of the panel price, plus shipping, is charged to your credit card when the panel is shipped.
We will email, mail, or fax you an order confirmation.*

32" x 48"	Mountain, Sun		\$600
46" x 46"	Moose, Fish		\$830

FAQ

What are balcony panels made from?

Our balcony panels are cut from 3/16" plate steel, which is about the thickness of three quarters and weighs around 7.66 pounds per square foot. The panels are hand drawn and machine cut, then cleaned and powder coated. Unless otherwise stated, all balcony panels meet a 4" maximum gap building code that we strictly adhere to. They can be placed inside or outside and will withstand the elements.

How much do your custom signs cost?

Signs **start** at \$60.00 per square foot. Depending on the material, complexity, and size, the price can go up from there. ****see custom sign pricing for more information****

What is the difference between linear and square feet, and how can I calculate them?

The **linear feet** is the length of the panel, regardless of height.

The **square feet** is the length of the panel multiplied by the height to find the total area.

Please read our customer agreement, initial by each paragraph, and return to us upon order of your custom job.

Customer Agreement

This customer agreement is used for any custom metal fabrication project including but not limited to: Balcony Panels, Custom Signs, Silhouettes, Gates and Doors, Fireplace Screens, Tables, Coat Racks, and Weathervanes.

Please print your name in the below paragraph on this page. On page 2, please initial next to each statement which confirms that you have read, understand and agree to the specific terms.

Finally, please sign and date at the bottom of page 2 of the agreement.

Customer: _____ has agreed to the terms and conditions

Stated in this agreement, and has made a plan with Split Mountain Metals/J.Dub's

Metalworks regarding delivery and pickup of their item(s). Split Mountain Metals is in

ownership of J.Dub's Metalworks and therefore in the below statements, Split Mountain

Metals/J.Dub's Metalworks will be referred to as SMM.

***Please initial by each paragraph after reading, then sign, and date the bottom when finished.*

1. If applicable, customers will be charged a custom drawing fee of \$75/hour in addition to the base cost of their product(s). SMM will start on the drawing after payment is made for the estimated drawing time. This amount will be credited to the final cost of the product. Customer is required to pay a minimum 50% deposit in order to start fabrication. The remaining 50% will be required before shipment of the product(s). SMM can keep customer payment information on file if the customer wishes to do so and fills out the appropriate form. Please contact SMM about this if you would like to discuss more.

2. All fabrication work is covered by a lifetime warranty on all welds performed, assuming proper use of products. Abuse and mistreatment of products, and/or material failures caused by manufacturer defects outside of our control are excepted from this warranty. Cast iron and cast aluminum are not covered by this warranty due to the nature of the material. The limitation of liability arising from the use or misuse, under ANY circumstances and due to any cause of any part, component or item created or repaired by Split Mountain Metals, be that the cost of labor to repair to original specification, performed by us.

3. Powder Coating is covered by a one (1) year warranty from time of completion of work. Powder coat, like any coating, will fail over time (typically 5-7 years). If the powder delaminates from the part, or fails within one (1) year, SMM will take appropriate steps for repair or replacement of the powder coating.

4. The dimensions provided by the customer or their contractor are assumed correct and are not the responsibility of SMM. SMM will provide a rendering with dimensions before fabrication to all customers. These dimensions are deemed final by the customer upon approval of the drawings. If the customer approves the final drawings provided by SMM and the items do not fit, SMM is not responsible or liable to reproduce any product free of charge. If the items built do not match the drawings provided by SMM, the items will be reproduced at no cost to the customer.

5. Upon delivery of the product(s), all packages must be fully inspected for damage, correct color, or improper construction. This must be completed within 14 days of arrival in order to file a claim.

6. We do everything possible, but sometimes **actual product appearance may vary slightly from initial rendered image** due to the nature of fabrication and cutting processes. Once an image is cut out, it may not look exactly like the rendering because of the fabrication process. Details smaller than 1/8" may look slightly different.

7. All items will be sold as-is, where-is, and are not covered by any warranty, expressed or implied by Split Mountain Metals (regardless of any manufacturer's warranty which may be relevant), unless listed above. ALL SALES ARE FINAL.

ABOUT THE FAMILY BEHIND SPLIT MOUNTAIN METALS AND JDUB'S METAL WORKS

Split Mountain Metals is a young and thriving company based out of beautiful Belgrade, Montana. We specialize in custom metal artwork, powder coating, signs and parts. Our work is personally created to reflect you and your unique lifestyle. Split Mountain Metals was established in 2014 by Brad and Carley Brenteson. As the business has grown Brad and Carley have been able to expand their shop into not only fabrication, but also a state of the art machining, as well as high quality powder coating, sand blasting, and a larger plasma cutting table for larger jobs to meet our customers needs.

We thank you greatly for your business!

**Brad, Carley, Maura Mae, Lacey, and Sage Brenteson;
and the entire team at Split Mountain Metals and JDUB's Custom Metalworks!**
